UltraFlora Probiotics for Kids

Give your kids a healthy start

Probiotics are live microorganisms that can contribute to overall good health. Probiotics act on the digestive tract where more than 70% of the immune system is located. But a number of factors even at early life stages—including delivery method and breast/formula feeding—can influence the body's balance of “good” and “bad” microorganisms and affect multiple aspects of health. A quality probiotic can help promote a healthy microbial balance to support children's health.*

Trust UltraFlora probiotics

UltraFlora formulas for children feature probiotic strains scientifically tested in children. And each formula is carefully manufactured and backed by the Metagenics ID Guarantee for purity, clinical reliability, and predicted safety via scientific identification of strains with established health benefits.*

UltraFlora Baby

Probiotic Support for Babies & Young Children*

- Designed for daily support of digestive function & immune health from 0 to 36 months*
- Features a probiotic blend of 1 billion organisms[†] per dose
- *Lactobacillus rhamnosus* GG (LGG[®]) and *Bifidobacterium animalis* ssp. *lactis* BB-12 (BB-12[®]) strains backed by numerous studies—including infant studies*
- Doesn't contain the anti-caking agent silicon dioxide (present in some children's probiotics)
- Gluten-free and vegetarian liquid with a neutral taste
- Easy-to-use dropper enables precision dosing
- May be applied to the nipples of nursing mothers or added to extracted human milk or prepared infant formula under a physician's supervision

UltraFlora Children's
