

UltraFlora[®] 3 in 1 Daily Probiotic

A triple action proprietary formula of scientifically researched probiotics and prebiotic dietary fiber to support wellbeing, gut health, and immunity.*

UltraFlora 3 *in* 1 formula is designed to strengthen digestive and immune systems to help keep the body in balance*

A healthy gut microbiota is not just a key player in digestive health but is increasingly recognized as a central component influencing overall wellbeing. A balanced and diverse community of beneficial bacteria in the gut contributes to proper digestion, a healthy immune system, and even mental wellbeing. In fact, studies identified a link between an imbalance in intestinal microbiota and issues related to the gut, body weight, and brain health.¹ Various factors in our hectic lives can disrupt this delicate equilibrium. Poor dietary habits, stress, certain medications, and sedentary habits can negatively impact the composition and function of our gut microbiota.²

Adopting a nutrient-rich diet, incorporating probiotics (live microorganisms that, when administered in adequate amounts, confer a health benefit on the host)³ and prebiotics (non-digestible fibers and compounds, that serve as fuel for the growth and activity for probiotics in the digestive system, promoting their activity and enhancing their beneficial effects)⁴, managing stress, and staying physically active are proactive steps that can promote a resilient and thriving gut microbiome, ultimately enhancing our overall health and wellbeing.²

Research into probiotic potential has primarily focused on *Lactobacillus* and *Bifidobacterium* genera. However, various strains of *Bacillus* have also been recently studied and have captured the interest of researchers. *Bacillus* spores are resistant to high temperatures and can withstand the stomach's harsh acidic environment, only germinating in the intestine when nutrients are present. This enhances their survival rate in the gastrointestinal tract, thereby better exerting probiotic effects.⁵

Introducing UltraFlora 3 in 1 Daily Probiotic

UltraFlora 3 in 1 is a proprietary synbiotic formula created by healthcare professionals containing two clinically studied probiotic strains—*Bacillus coagulans* SNZ 1969® and *Bacillus subtilis* DE111®—known to promote gut and immune health in both adults and children, and to maintain healthy cholesterol levels already within the normal range in adults.*

This daily supplement also features a prebiotic sourced from chicory root, which has been purported to have numerous health benefits. This synbiotic gummy formulation is free of added sugars, artificial sweeteners, or gelatin, making it an ideal choice for those seeking a convenient and palatable alternative to traditional tablets or capsules.

Clinical evidence	<i>Bacillus coagulans</i> SNZ 1969 ⁶⁻⁸ 1-2 billion CFU	<i>Bacillus subtilis</i> DE111 ⁹⁻¹³ 1 billion CFU
Assists good gut health and digestion*	 	 
Nourishes healthy gut bacteria*	 	 
Provides daily immune support*		 
Supports bowel regularity*	 	 
Helps relieve abdominal discomfort or occasional constipation*	 	
Helps support a healthy heart*		 

Who can benefit from UltraFlora 3 in 1 Daily Probiotic?

- Patients suffering from occasional constipation
- Patients looking to support their immune health
- Patients looking to maintain healthy cholesterol levels[†]
- Patients seeking to enhance their overall health and wellbeing
- Patients looking for immune and gastrointestinal health and normal bowel movement support for their young children

[†]already within the normal range

A delicious gelatin-free, sugar-free gummy worthy of a health care provider's recommendation!
